Suzano - Sao Paulo - Brazil

matheus_barbosa@usp.br

Experience

USPCodeLab - Developer and Tutor   Since April 2019

- Coordinated a project that helps new students to their abilities to code and professional development.
- Elaborated Methodology to Spread knowledge more effective.

B4A group - Software development Intern   December 2018 - April 2019

- Integrated new supply carriers using their APIs.
- Optimized of SQL queries due faster process on database.
- Coordinated of Hardware maintenance and distribution.

Important to note : I have learned SQL in there this can show that I could develop new technical skills quickly and apply them to practical results.

Education

University of São Paulo , São Paulo, SP - Brazil
B.A , Information Systems   class of 2021

Coursework :

Data Structures	Algorithms
Database Systems	Discrete Math
Linear Algebra & Differential Equations	Design Patterns

Skills / Tools

Java - Python -JavaScript - SQL - C/C++ - Unix - SQL - HTML - CSS - Node.js - Git

Languages : English (Fluent) , Portuguese (Native)

Additional Information

Artificial intelligence and Machine learning course by Alura : Developed validation ,classification and optimization models and algorithms using techniques like NPL and supervised learning , and in the end of this course we were exposed with some Deep Learning models using Keras.
